

VITAL ZONE - WILD BOAR

Broadside. Schematic outline with the heart-lung zone marked.

Reduced to 1:8.4 (full size 1500 x 900 mm) - this is a reference reproduction, not a full-size competition target

Dimensions

Measurement	Value
Vital zone	190 mm (7.5")
On this sheet	22.5 mm
Body, full size	1500 x 900 mm
Scale	1:8.4

Vital zone 7.5 in / 190 mm - no bigger than a deer's, but carried lower and tighter behind the shoulder. The heart sits low behind a heavy shoulder shield, so a deer hold passes over the top of it. Schematic outline, not an anatomical drawing - the zone is where to aim on paper, and the animal in front of you is the one that decides whether the shot is there. Reduced: measure the bar below before using any dimension off this sheet.
