

VITAL ZONE - COYOTE

Broadside. Schematic outline with the heart-lung zone marked.

Reduced to 1:6.5 (full size 1150 x 660 mm) - this is a reference reproduction, not a full-size competition target

Dimensions

Measurement	Value
Vital zone	102 mm (4")
On this sheet	15.7 mm
Body, full size	1150 x 660 mm
Scale	1:6.5

Vital zone 4 in / 102 mm - heart and lungs, broadside, behind the shoulder. A coyote is a small target carried on long legs: the chest is shallow, so the same vertical error that clips a deer low misses a coyote entirely. Schematic outline, not an anatomical drawing - the zone is where to aim on paper, and the animal in front of you is the one that decides whether the shot is there. Reduced: measure the bar below before using any dimension off this sheet.
