

VITAL ZONE - PRONGHORN

Broadside. Schematic outline with the heart-lung zone marked.

Reduced to 1:7.9 (full size 1400 x 880 mm) - this is a reference reproduction, not a full-size competition target

Dimensions

Measurement	Value
Vital zone	203 mm (8")
On this sheet	25.8 mm
Body, full size	1400 x 880 mm
Scale	1:7.9

Vital zone 8 in / 203 mm - heart and lungs, broadside, behind the shoulder. The same zone as a whitetail on a shorter, shallower animal, which is why pronghorn are usually missed at range rather than mis-placed: the hold is right and the distance is not. Schematic outline, not an anatomical drawing - the zone is where to aim on paper, and the animal in front of you is the one that decides whether the shot is there. Reduced: measure the bar below before using any dimension off this sheet.

CHECK BEFORE USE - this bar must measure exactly 100 mm. Print at 100%, not "fit to page".
